PROFESSIONAL SUMMARY

Full Stack Software Developer and Quality Assurance Supervisor with experience in web applications, desktop systems, databases, and process automation. Specialized in C#, .NET, Angular, SQL Server, SQLite, Supabase, and solutions focused on operations, quality, and traceability. Experience in analysis, design, implementation, testing, maintenance, and continuous improvement of systems.

PROFESSIONAL EXPERIENCE

Quality Assurance Supervisor | Contec / Conductores Tecnológicos de Juárez

May 8, 2026 - Present

- Supervise and follow up on quality assurance activities in automotive wiring harness manufacturing.
- Coordinate inspections, releases, findings, and corrective actions.
- Verify drawings, dimensions, ties, routing, clips, holders, and tooling.
- Develop and promote digital tools for data capture, traceability, and operational indicators.

Quality Assurance Technician | Contec / Conductores Tecnológicos de Juárez

October 20, 2025 - May 7, 2026

- Reviewed tooling and validated wiring harnesses against drawings and quality criteria.
- Documented defects, followed up on findings, and supported corrective actions.

Quality Inspector | Contec / Conductores Tecnológicos de Juárez

August 12, 2025 - October 19, 2025

- Inspected completed wiring harnesses, detected defects, and recorded results.

Co-founder / Full Stack Developer | MaxSoft México

December 2025 - Present

- Develop websites, custom solutions, and business automations.
- Design responsive interfaces, catalogs, portfolios, and deploy websites.

Full Stack Software Developer | Independent Projects

2018 - Present

- Build web and desktop systems using C#, ASP.NET, Angular, React, Node.js, and SQL Server.
- REST APIs, authentication, roles, administrative CRUD modules, reports, and relational databases.

Web Developer | Universidad Autónoma de Occidente

2019 - 2020

- Developed features with ASP.NET, JavaScript, and SQL Server for academic management.
- Automated certificates and PDF/Excel reports.

IT Maintenance Technician | Universidad Autónoma de Occidente

2018

- Performed preventive and corrective maintenance, software installation, and technical diagnostics.

FEATURED PROJECTS

“Aseguranza” Certification Management System | C#, WinForms, SQL Server, SQLite, Azure SQL

Management of employees, processes, certifications, validity periods, cancellations, photographs, records, and credentials.

IPD Management Platform | Angular, Supabase, PostgreSQL, Realtime

Multi-user defect capture with authentication, roles, RLS, dashboards, and real-time operations.

Visual Release and Quality Findings System | Excel VBA, Dashboards, Automation

Interactive layouts, tolerances, point-based records, and finding statuses; web migration planned.

Academic Event Management System | ASP.NET, Angular, SQL Server

Conferences, registration, attendees, PDF certificates, and Excel reports.

TECHNOLOGIES

Backend: C#, .NET, ASP.NET Core, ASP.NET Framework, Node.js, Express, NestJS, REST APIs.

Frontend: Angular, TypeScript, JavaScript, React, HTML5, CSS3, Bootstrap, Tailwind CSS, Angular Material.

Databases and cloud: SQL Server, SQLite, PostgreSQL, Supabase, Azure SQL Database, stored procedures, indexes, and optimization.

Desktop and automation: Windows Forms, .NET MAUI, Excel VBA, WebView2, PDF and Excel generation.

Tools: Git, GitHub, Visual Studio, VS Code, Swagger/OpenAPI, Docker.

EDUCATION

Bachelor's Degree in Computer Systems - Universidad Autónoma de Occidente (UAdeO), Los Mochis, Sinaloa. Completed in July 2020.

LANGUAGES

Spanish: Native | English: B2 - Intermediate | Portuguese: B2 - Intermediate

STRENGTHS

Process analysis | Automation | Operational leadership | Continuous improvement | Solution design | Traceability | Continuous learning
