PROFESSIONAL SUMMARY

Full Stack Software Developer and Quality Assurance Supervisor with experience in web applications, desktop systems, databases, and process automation. Specialized in C#, .NET, Angular, SQL Server, SQLite, and solutions focused on operations, quality, and traceability. Experienced across the software development lifecycle, including analysis, design, implementation, testing, maintenance, and continuous improvement.

PROFESSIONAL EXPERIENCE

Quality Assurance Supervisor | [Contec / Conductores Tecnológicos de Juárez](#)

May 8, 2026 - Present

- Supervise and follow up on quality assurance activities in automotive wiring harness manufacturing.
- Coordinate inspections, releases, findings, and corrective actions to ensure compliance with specifications.
- Verify drawings, dimensions, ties, routing, clips, holders, boards, forks, and process tooling.
- Promote digital tools to improve data capture, traceability, visual control, and operational indicators.

Quality Assurance Technician | [Contec / Conductores Tecnológicos de Juárez](#)

October 20, 2025 - May 7, 2026

- Reviewed tooling and validated wiring harnesses against drawings and quality requirements.
- Documented and followed up on defects, findings, and corrective actions with operations personnel.
- Identified automation opportunities to reduce errors and improve process control.

Quality Inspector | [Contec / Conductores Tecnológicos de Juárez](#)

August 12, 2025 - October 19, 2025

- Inspected completed wiring harnesses, detected defects, and validated acceptance criteria.
- Recorded results and communicated deviations for correction and follow-up.

Co-founder / Full Stack Developer | [MaxSoft México](#)

December 2025 - Present

- Develop websites, custom solutions, and business automation proposals.
- Design responsive interfaces, catalogs, portfolios, and solution architectures with a commercial focus.
- Contribute to service definition, digital presence, technical documentation, and deployment.

Full Stack Software Developer | [Independent Projects](#)

2018 - Present

- Build web and desktop systems using C#, ASP.NET, Angular, React, Node.js, and SQL Server.
- Implement REST APIs, authentication, roles, administrative CRUD modules, reports, and relational databases.

Web Developer | [Universidad Autónoma de Occidente](#)

2019 - 2020

- Developed features with ASP.NET, JavaScript, and SQL Server for academic management.
- Automated certificates and PDF/Excel reports, as well as administrative CRUD modules.

IT Maintenance Technician | [Universidad Autónoma de Occidente](#)

2018

- Performed preventive and corrective maintenance, software installation, and hardware and operating system diagnostics.

FEATURED PROJECTS

"Aseguranza" Certification Management System | [C#](#) · [WinForms](#) · [SQL Server](#) · [SQLite](#) · [Azure SQL](#)

System for managing employees, processes, certifications, validity periods, cancellations, photographs, records, and credentials. Includes visual statuses, filters, stored procedures, and a portable SQLite version.

IPD Management Platform | [Angular](#) · [Supabase](#) · [PostgreSQL](#) · [Realtime](#)

Web application for multi-user capture of the defective-parts index, with authentication, roles, RLS, dashboards, Live Operations, normalized defect breakdowns, and private photo storage.

Visual Release and Quality Findings System | [Excel VBA](#) · [Automation](#) · [Dashboards](#)

Visual tool with interactive layouts, point- and station-based records, dimensional tolerances, open/in-progress/closed statuses, and traceability. Migration to a multi-user web application is planned.

Academic Event Management System | [ASP.NET](#) · [Angular](#) · [SQL Server](#)

System for conferences, participant registration, attendee control, and automatic generation of PDF certificates and Excel reports.

TECHNOLOGIES

Backend: C#, .NET, ASP.NET Core, ASP.NET Framework, Node.js, Express, NestJS, REST APIs.

Frontend: Angular, TypeScript, JavaScript, React, HTML5, CSS3, Bootstrap, Tailwind CSS, Angular Material.

Data and cloud: SQL Server, SQLite, PostgreSQL, Supabase, Azure SQL Database, stored procedures, indexes, and query optimization.

Desktop and automation: Windows Forms, .NET MAUI, Excel VBA, WebView2, PDF/Excel generation.

Tools: Git, GitHub, Visual Studio, VS Code, Swagger/OpenAPI, Docker.

EDUCATION

Bachelor's Degree in Computer Systems

Universidad Autónoma de Occidente (UAdeO), Los Mochis, Sinaloa | Completed in July 2020

LANGUAGES

Spanish: Native **English:** B2 - Intermediate **Portuguese:** B2 - Intermediate

PROFESSIONAL STRENGTHS

Process analysis · Automation · Operational leadership · Continuous improvement · Solution design · Traceability · Continuous learning
